

So... HOT!

WARMING TINGLE BRONZER

Bronzer with warming tingle effect.

Strength ★★★

70x

“

The devil is not so black as he is painted.

Effect after application:

A pleasantly warming touch that can be felt during long exposure to the sun. That's how to briefly describe the tingle effect. If you combine it with an energising bronzer, you'll get so... HOT!

The depth of the tan and warming effect result from natural extracts of cayenne pepper, pepper, caffeine as well as erythrulose-based DelayedBronzers Formula.

The effect of using so... Hot! is a long-lasting tan that lasts for even two weeks.

Fragrance:

fresh

Lotion colour:

brown

Capacity:

15 ml / 250 ml

delayed bronzer

contains aloe vera

warming tingle effect

DHA

A unique combination of warming ingredients and bronzers.

The DelayedBronzers Formula

based on DHA whose effect can be noticed after a dozen or so hours after a tanning session, whereas the effects deepen over time. The effect of delayed bronzers may last for up to 4 days, whereas the tan is deep and lasts longer.

Caffeine extract

boosts skin microcirculation, helps fight against unwanted adipose tissue.
